EDUCATION

INTERNET OF THINGS APPLICATIONS (M.Sc. Eng.)
Faculty of Physics and Astronomy, AMU |
February 2025 - July 2026

COMPUTER TECHNOLOGIES (B.Sc. Eng.)
Faculty of Physics and Astronomy, AMU |
October 2021 - February 2025

TEACHER TRAINING COURSE
Physics Teaching, AMU | October 2021 -
February 2025

IT TECHNICIAN
ZSE No. 2 in Poznań | September 2017 -
May 2021

CORE SKILLS

English (B2+) C# & Unity 3D
Unity ML-Agents
Unreal Engine & Godot Basics
Python (Data Science, OpenCV)
Meta SDK / Quest 2/3
VR / AR / MR
URP / HDRP Optimization
Multiplayer & Networking
(Netcode)
AI & LLM (Ollama, ML-Agents)
IoT & Embedded (ESP32, Arduino)
Machine Vision (Marker-based
Tracking)
3D Printing (FDM)
Linux & TCP/IP Networks
Git / GitHub

MIŁOSZ KLIM

Software Engineer

ABOUT ME

For several years I have been commercially and scientifically involved with VR/AR technologies and the Unity engine. My primary language is C#, but I also frequently use C/C++ and Python. I create advanced simulations, business applications, and multiplayer games, including distributed architecture systems. My strong suit is rigorous performance optimization for mobile and standalone devices (Meta Quest 2 and 3) as well as integrating the software layer with custom hardware. I have experience both in production work with artists in gamedev, and in delivering pioneering implementations for business and medicine.

PROFESSIONAL EXPERIENCE

IT Solutions Integrator / Unity 3D Developer
Komputronik Biznes | April 2024 - January 2026

- Working in the R&D department on commercial technological implementations in the Unity 3D engine.
- Designing and implementing an advanced environment supporting children's rehabilitation for the W. Dega Orthopedic and Rehabilitation Hospital.
- Creating a modern business application supported by artificial intelligence algorithms for a popular chain of original circular fashion boutiques.

Unity 3D Developer
Flying Octopus | June 2021 - June 2025

- Creating and developing C# mechanics for the Unity 3D engine as part of a student gamedev collective.
- Ensuring flexibility and scalability of the code architecture in collaboration with the art team.
- Mentoring junior developers, performing code reviews, and onboarding new team members.

Founder, Head of the Digital Realities Section
Student Science Club Errno | 2022 - 2026

- Managing interdisciplinary projects in the field of XR/VR technologies and artificial intelligence.
- Organizing nationwide workshops and scientific lectures.
- Cooperation with OCETA.
- Awarded Best Science Club in the scientific category at the AMU Science Clubs Day in 2023, less than a year after its foundation.

Physics Teacher & Teaching Assistant
Primary School No. 67 & AMU in Poznań | February 2023 - June 2024

- Teaching and promoting new technologies in the educational system by introducing 3D printing (FDM) and robotics to regular classes.

IT Internships & Apprenticeships (Hardware Service)
NaprawiamyLaptopy.pl, KomputerSerwis, Pc Service di Riccardo Greco | 2019

- Proficient hardware diagnostics, electronics repair, and computer infrastructure service in Poznań and during an international internship in Ravenna (Italy).

DETAILED SKILLS

Gamedev, VR & Optimization

- **Unity 3D and C#:** Advanced level. Creating distributed mechanics, optimizing draw calls/batching for URP and HDRP pipelines, custom shaders (Shader Graph).
- **XR Environment:** Proficient in Meta SDK. Advanced game optimization for Meta Quest 2 / 3 headsets and PCVR architecture.
- **Other Engines:** Basic knowledge of Godot and Unreal Engine (C++).

IT Architecture, Networking & AI

- **VR Multiplayer:** Implementing Netcode for GameObjects in client-server architecture and RPCs, effectively mitigating motion sickness.
- **IoT & Sim2Real:** Designing communication between the game engine and ESP32/Arduino microcontrollers, hardware immersion extensions.
- **Artificial Intelligence:** Training agents in a virtual environment (Reinforcement Learning / ML-Agents) and working with local LLM models (Ollama).
- **Network Operating Systems:** Configuration of small and medium-sized computer networks, including basic administration of Linux and Windows-based servers.

KEY PROJECTS

"Minerwa" Shooting Training System

- Architecture based on a proprietary marker-based machine vision module applied in real-time to Unity logic.
- Hardware integration using ESP32 microcontrollers and performance optimization of the desktop application.

"Rouge Squadron" VR Simulator (Engineering Thesis)

- Creation of a fully cooperative spaceship simulator in VR (LAN Multiplayer / Netcode).
- Conducting medically documented research on the increase of perceived stress (electrodermal activity - EDA) in players in virtual reality.

Biofeedback and Multisensory Immersion in VR (Master's Thesis)

- Creation of a research simulator integrating testers' biometric parameters (heart rate, EDA) in real-time directly with the Unity engine.
- Independent construction of a physical olfactory module managed by a microcontroller communicating with the game.

LAB-VR Educational Platform

- Leading the development team of an educational simulation for public schools, released under an open-source license.
- Focusing on the seamless operation of the application (Android/ARM) on Meta Quest headsets, which allowed for organizing XR workshops in schools across the country.

WST - Mixed Reality Drones & AI Sim2Real

- Managing a project separating learning algorithms (AI trained using Unity environment physics) from hardware. The AI manages a real water drone anywhere in the world thanks to a VPN network and ESP32 controllers optimized in C/C++.

CONFERENCES & CERTIFICATES

- **Industry talks and presentations (PGA, Pyrkon, OCETA):** Regular lectures in fields such as *Zero-Trust AI* and *Embodied Presence in XR*, as well as organizing public presentations of VR projects at Game Jams and conventions.
- **Unity:** VR Development, Junior Programmer
- **Cisco Networking Academy:** CCNA R&S (Introduction, Routing & Switching), CPA (C++), PCAP (Python), IoT Fundamentals, Cybersecurity, Get Connected, IT Essentials
- **Udemy:** C#.NET (WPF and XAML), Beginning C++, Unreal Engine 5 C++ Developer
- **Google:** Fundamentals of digital marketing, Google Analytics
